Abdelrahman Eldeisty Hamed

Backend Developer (Laravel / MySQL)

✉ abdulrahmaneldeisty@gmail.com • ☎ +20 104 377 8564 • Mansoura, Dakahlia, Egypt • GitHub • LinkedIn

SUMMARY

Motivated Backend Developer with strong experience in building and managing RESTful APIs using Laravel and MySQL. Proficient in developing admin dashboards with Filament, integrating payment gateways (Stripe, PayPal), and handling complex user roles and permissions. Dedicated to writing clean, maintainable code and contributing to real-world applications within collaborative team environments.

TECHNICAL SKILLS

Backend
- PHP (OOP)
- Laravel 10
- MySQL (Relationships, Migrations)
- RESTful APIs & Authentication
- Firebase (FCM), OneSignal

Frontend
- HTML5, CSS3, JavaScript
- jQuery, Ajax
- Bootstrap
- Livewire

Tools & Other
- Git & GitHub
- Filament (Admin Panel)
- Stripe & PayPal Integration
- Pusher (Real-time)
- Spatie (Permissions & Settings)

PROFESSIONAL EXPERIENCE

Fourth Pyramid — Software Engineer (full-time) *Mansoura, Egypt*

Wasly — Multi-Vendor Supermarket & Services ↗ *Laravel 10, MySQL, Filament, Firebase (FCM), Google Socialite, OTP, RESTful APIs*

GitHub ↗

A comprehensive web and mobile platform featuring a supermarket for products and a service marketplace. Supports two user types: regular customers and service providers (created via dashboard). Includes Google authentication, OTP system, Firebase notifications for providers and admins, and a product coupon system.

Aqar Mousa — Real Estate & Land System ↗ *PHP, Laravel, MySQL, Filament, RESTful APIs, FFmpeg*

GitHub ↗

A comprehensive system for selling and renting lands, designed to support real estate properties in the future. Features an optimized RESTful API engine, a custom localized Arabic RTL admin dashboard (Filament PHP) with role-based access control (Spatie), advanced search filtering, and media hub video transcoding using FFmpeg.

KCODE — Skincare Recommendation Engine & E-Commerce ↗ *Laravel, PHP 8.3, MySQL, Filament PHP, Google Gemini AI, RESTful APIs, Spatie*

An advanced e-commerce platform featuring an intelligent skincare recommendation engine and quiz flow algorithm. Evaluates user skin goals, types, and concerns in real-time to generate dynamic 5-step personalized routines, integrated with Google Gemini AI and a full Filament admin dashboard.

Bynona — E-commerce ↗ *Laravel 10, MySQL, Filament, Firebase, Spatie, Pusher, Bootstrap*

A comprehensive web and mobile E-commerce platform supporting retail and wholesale. Features advanced product variants, a complete checkout system, real-time notifications, and a full Filament admin dashboard for product and order management.

LEGACY PROJECTS & ENHANCEMENTS

Move Saudi — Service Company Profile ↗ *Laravel, JavaScript, AJAX*

A profile and landing website for a service company. Refactored the application to optimize website performance and built a custom dashboard for managing services and content.

RTS Clean — Service Company Profile ↗ *Laravel, JavaScript, AJAX*

A profile and landing website for a professional cleaning services company. Refactored the application to optimize website performance and built a custom dashboard for managing services and content.

Ostora Qalep Elkalig — Service Company Profile ↗ *Laravel, JavaScript, AJAX*

A profile and landing website for a service company. Refactored the application to optimize website performance and built a custom dashboard for managing services and content.

PROFESSIONAL EXPERIENCE (CONT.)

Freelance Projects *Remote / Part-time*

SpeechClinic — Speech Clinic Booking System ↗ *Laravel, MySQL, Firebase (FCM), Google Socialite, OTP Auth, RESTful APIs*

A specialized booking platform for speech therapy clinics. Integrated a secure OTP-based authentication system and Google Login. Features real-time Firebase notifications for efficient user communication and session management.

OTHER PROJECTS & PORTFOLIO

Blood Bank Platform ↗ *Laravel, MySQL, RESTful APIs, AJAX*

A life-saving platform bridging donors and recipients. Includes donation request management, blood-type based location alerts, and user authentication.

Sofra — Food Delivery App ↗ *Laravel, MySQL, RESTful APIs, Bootstrap*

Dual-interface app for restaurants and customers to manage menus, offers, and real-time order tracking with role-based dashboards.
